CAREER OBJECTIVE

B.Tech Artificial Intelligence and Machine Learning student seeking an internship in machine learning, software development and web development to apply skills in Java, front-end technologies to real-world projects, continuously learning new technologies.

TECHNICAL SKILLS

Languages/Tech: C,Python,java,HTML,CSS,JavaScript,SQL,DBMS,Data Structures and Algorithms

Tools: Git, GitHub, MS Word, Excel, PowerPoint,Canva

Core Subjects:Operationg System,Computer Networks,RDBMS,ML concepts,Deep Learning Concepts,SQL

PROJECTS

Multimodal Emergency Patient Care Prediction (Machine Learning)

Built a multimodal machine learning model to predict emergency patient risk and ICU admission using structured EHR data and triage notes.

Used BERT-based NLP embeddings and multimodal feature fusion to improve prediction performance.

Crime Rate Prediction (Machine Learning)

Developed a predictive analytics model to analyze crime datasets and identify temporal and spatial patterns.

Applied machine learning techniques for data preprocessing, feature engineering, and risk prediction.

YouTube Video Transcript Summarizer

Built an AI-powered application that extracts transcripts from YouTube videos using available APIs.

Implemented NLP-based text summarization to generate concise, context-aware summaries of long-form content.

NLP Text Analysis Tool

Developed a full-stack NLP application using FastAPI (Python backend) and HTML/CSS/JavaScript frontend

Implemented text preprocessing and analysis via RESTful APIs ,designed a responsive and lightweight user interface

Deep Learning-Based Virtual Calculator

Developed a deep learning virtual calculator that recognizes handwritten equations using CNNs and understands natural language using RNNs,providing real-time,step-by-step solutions to mathematical problems for students an professionals.

CERTIFICATIONS & ACHIEVEMENTS

CCNA: Introduction to Networks – Cisco Networking Academy.

Infosys Springboard — General Completion Certificate

Hackathon Participation – IIT Hyderabad

Participant-Android App Development Workshop(IIT Hyderabad).

Showcased proficiency in coding and problem-solving through Smart Interviews.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning	2023–2027
BV Raju Institute of Technology Narsapur	8.46 CGPA
Diploma – Computer Science Engineering	2021 – 2024
Government Polytechnic, Masabtank	8.87 CGPA
SSC (10th Class)	2021
CGPA: 10
